Summary

- Extensive experience in optical transport network architecture (e.g. OTN, SONET), network element architecture, design, and implementation of carrier-grade transmission products.
- Extensive experience in developing requirements for ASICs/FPGAs used in OTN network elements
- Regular contributor to ITU-T SG15 in the following areas: OTN Equipment, OTN Signal Formats & OTN Network Element Management.
- Co-authored IETF drafts related to GMPLS Extensions to support Beyond 100G OTN links, FlexE connection signaling.
- Hands on experience with the design & implementation of protocol software for Layers 2-5 of the OSI stack (e.g. LAPD, CLNP, IS-IS, ES-IS, TP4), IP/ATM, MPLS based L3VPNs
- In-depth understanding of networking protocols, and their applications

Work Experience

10/2006 – Present

System Architect (Distinguished Engineer), *Infinera Corp*, Sunnyvale, USA.

- Developed (white-box) requirements for various generations of Infinera ASICs in these areas: G.709 OTN tributary interfaces, FlexE, FlexO, Infinera Proprietary Signals/Formats (used on the line-side interfaces), Overhead processing, Alarm Propagation. Supported the ASIC development team through all stages of development to ensure full compliance to applicable standards.
- Developed requirements for Layer 1 encryption (AES-GCM, AES-CTR modes) in INFN ASICs: at the ODU layer (in mapper ASIC) & bulk encryption (DSP ASIC). These requirements addressed the following aspects: algorithmic compliance, support for minimizing the cryptographic boundary (for FIPS 140-2 validation)
- Developed the End-2-End mechanism for Shared Mesh Protection (SMP) for ODU connections. This mechanism has been presented in various contributions to ITU-T SG15 Q9 (OTN Equipment). This work contributed to the ITU-T recommendation G.783.3.
- Defined the mechanism to support hitless ODUFlex resizing (specific to DTN-X networks). Working with ASIC & Software teams to get the mechanism implemented.
- Developed requirements related to control channel realization (e.g. trib & line side GCC channels) for several generations of Infinera's Network Elements.
- Developed DTN-X Network Architecture Specification. This specification takes a top-down view of DTN-X networks, and contains an in-depth coverage of these aspects: Layers (i.e. SignalsFormats), Adaptations, OTN atomic function realization, and Defect propagation. This document is used as the basis to derive requirements for the ASICsFPGAs.
- Developed DTN Network Element requirements for these areas: GMPLS, L1VPN, Datapath recovery (protection, and restoration).

5/2005 – 10/1/2006

System Architect, *Fujitsu Network Communications*, Richardson, USA.

- Participated in the architecture definition of the FW9500 hybrid platform that supported TDM & Packet services (e.g. Point-to-Point Ethernet, VPLS) based on MPLS Pseudowires
- Developed System Level Requirements for VPLS/H-VPLS, Control Plane High-Availability.

12/2003 – 4/2005 **Contractor (SW development)**, *Nortel*, Richardson, USA.

- RSVP-TE for GGSN node: Wrote Functional Spec, Detailed Design & Designer Test plan. Worked on design changes support for a redundant control processor.
- BGP/MPLS VPNs for GGSN node: Wrote the Designer Test plan, Added support for MPLS & VRF historical statistics.

10/2003 – 11/2003 **Contractor (SW development)**, *Avici*, Billerica, USA.

- Resolved software issues related to: PPP, SONET Link Aggregation, MPLS LSP Protection (Fast Reroute).

12/2002 – 5/2003 **Contractor (Systems Arch)**, *Ciena*, San Jose, USA.

- Specified the functional requirements for the CoreDirector features: Connection Test Access, Connection Loopback, OSI/DCC, 1GE/10GE tunneling with SONET/SDH VCAT/LCAS).

5/1998 – 8/2002 **Systems Architect**, *Fujitsu Network Communications*, Richardson, USA.

- Part of the team tasked with developing the architecture for the first TDM/Packet Hybrid. Primarily responsible for Layer 2 and Layer 3 VPN support over MPLS networks.
- Investigated protection of Point-to-Multipoint (P2MP, or multicast) MPLS LSPs, for the purposes of offering a fully protected TLS service.
- Specified the optical UNI (O-UNI) interface between an MPLS LER (Label Edge Router), and the Optical Network Element (ONE).
- Specification of Network Element Management Information models, and protocol specific realizations (in terms of TL-1 and SNMP)

6/1984 – 5/1998 **Member of Scientific Staff**, *Nortel*, Ottawa, Canada.

- Part of a team defining the End-to-end architecture of a system offering Broadband access.
- Developed various features for the HFC Cable Modem. E.g. Lightweight ATM signaling protocol, IP NAT (to support multiple attached PCs), Software Upgrade
- Designed & Developed software for the following layers in the OSI Stack: LAPD (with QoS), Layer 3 (CLNP, IS-IS, ES-IS), and Layer 5 (Session Layer). Implemented performance enhancements at Layers 2 through 4 of the OSI stack
- Implemented various STREAM's modules (e.g. TPI, Line Discipline Module, Serial Drivers)
- Implemented a bridge for interconnecting IBM Token Ring LANs via a Frame Relay WAN
- Analysis, Design, and Implementation of transparent access to (XMS based) remote file servers (via X.25 networks), file transfer utilities.

4/1981 – 6/1984 **SW Designer**, *Micom*, Montreal, Canada.

- Designed and Implemented software for data communication protocols (e.g. BISYNC, SDLC, ISO Transport Layer 4/0, Session/Transport layers for Teletext service)

Education

9/1987-12/1990 **Ph.D. (Electrical Engineering)**, *Carleton University*, Ottawa, Canada.

1979-1981 **M. Sc. (Computer Science)**, *McGill University*, Montreal, Canada.

7/1973-5/1978 **B. Tech. (Electronics and Electrical Communication)**, *Indian Institute of Technology*, Kharagpur, India.

Honors/Awards

2009 Infinera President's Award. Awarded by Infinera President.

1991 Carleton University Medal for Outstanding Graduate Work at the Ph.D. level. Awarded by Carleton University.

Sept 1987 - Jan 1991 Post-Graduate Scholarship from Nortel. Awarded by Nortel.

Sept 1987 - August 1990 Post-Graduate Scholarship from the Natural Sciences and Engineering Research Council (NSERC) of Canada. Awarded by NCERC.

1978 President of India silver medal. Awarded by IIT Kharagpur. Awarded for best academic performance in the graduating batch of the B. Tech program in the Electronics & Communication Engineering (ECE) department

1973 Stood fourth in the state of West Bengal in Higher Secondary Examination. Awarded by West Bengal HS Board.
